

Solenoid directional valves type DLOH, DLOK

poppet type leak free, direct operated, ISO 4401 size 06

DLOH and DLOK are poppet type, two or three way, two position direct operated solenoid valves, designed to operate in oil hydraulic systems with leak free requirements.

They are operated by wet type solenoids type OE for DC and RC rectified current supply.

The DLOH are available with optional manual prolonged override, protected by a rubber cap ⑥.

Standard dimensions cartridge construction allows a wide variety of configurations only by easy replacement of the cartridge ④. Cartridges of DLOH are available also as loose parts for mounting in manifolds, see ⑩.

The coils ② are fully encapsulated with temperature class H.

Mounting surface: **ISO 4401 size 06**

Max flow: **12 l/min (DLOH)**

30 l/min (DLOK)

Max pressure: **350 bar for DLOH**

315 bar for DLOK
